MICHAEL ANGELOU C. QUINIT

AI WEB DEVELOPER | FULL-STACK DEVELOPER

Iligan City, Philippines (Open to Remote) | +63 992 682 4313 | michaelangeloucquinit@gmail.com
Portfolio: [YOUR PORTFOLIO URL] | **GitHub:** github.com/Aenzari | **LinkedIn:** linkedin.com/in/michael-angelou-quinit-9071b7410

PROFESSIONAL SUMMARY

Full-Stack Developer and 4th-year BS Information Technology student (Major in Database Systems) with hands-on experience building and deploying web applications using React, Node.js, Express.js, and graph, NoSQL, and relational databases. Founder and lead developer of Kusyna, a startup web application, responsible for development and deployment. Skilled at using AI tools such as Claude to speed up code generation, debugging, and documentation. Available for remote part-time, contract, and freelance roles.

CORE COMPETENCIES

Full-Stack Web Development • AI-Assisted Development • Database Design & Management • REST API Development • Role-Based Access Control • Real-Time Data Systems • Web Application Deployment

TECHNICAL SKILLS

Languages: JavaScript, HTML5, CSS3, SQL, Cypher
Frontend: React, Tailwind CSS
Backend: Node.js, Express.js, REST APIs
Databases: Neo4j (Graph), PostgreSQL, MySQL, Redis, NoSQL
Tools & AI: Git, GitHub, Visual Studio, Claude AI (code generation, debugging, technical documentation)

FEATURED PROJECTS

Kusyna – Startup Web Application Founder & Lead Developer
[KUSYNA LINK]

- Independently designed, developed, and deployed a startup web application intended for future commercial launch.
- Led all technical decisions across architecture, development, and deployment as sole developer and project handler.
- Built a recommendation engine that captures real-time user demand and surfaces the most requested items.
- Used AI-assisted workflows to accelerate development and debugging.

EpiGraph – Epidemiological Command Dashboard Full-Stack Developer
[EPIGRAPH LINK]

- Built a healthcare tracking dashboard on a Neo4j graph database to map airborne disease transmission through human contact and shared locations.
- Implemented transmission-chain logic to help health authorities identify targeted quarantine candidates.
- Wrote and optimized Cypher queries and data lifecycle handling using Claude AI in Visual Studio.

baylo – AI-Powered Skills Marketplace & Time-Bank Full-Stack Developer
[BAYLO LINK]

- Developed a cashless, credit-based exchange platform where users trade skills and services.
- Implemented an AI matchmaking algorithm that connects users based on needs and offerings.
- Built secure credit-based transaction logic for tracking and balancing exchanges.

Additional projects (The Safehouse, Golazo / UI-SMS, WeCats) are available on my portfolio and GitHub.

EDUCATION

Bachelor of Science in Information Technology (Major in Database Systems) Expected 2027
Mindanao State University – Iligan Institute of Technology, Iligan City, Philippines
